

VendorBridge IQ

Intelligent Procurement & Vendor Management Ecosystem

Problem Statement

Traditional procurement systems primarily focus on recording transactions and managing workflows. However, organizations still face several procurement challenges:

- Difficulty identifying reliable vendors
- Lack of visibility into vendor performance
- New vendors struggle to gain opportunities
- Procurement decisions are often based only on price
- Partial inventory availability creates procurement delays
- No intelligent recommendations for vendor selection
- Limited procurement analytics and decision support

VendorBridge IQ transforms procurement from a transaction-based ERP into an intelligent procurement ecosystem that helps organizations make better purchasing decisions.

Vision

VendorBridge IQ is an AI-assisted procurement platform that combines:

- Procurement ERP
- Vendor Marketplace
- Vendor Reputation System
- Procurement Intelligence Engine
- Risk Assessment Framework

The platform not only manages procurement workflows but also guides organizations toward optimal procurement decisions.

User Roles

Admin

Responsibilities:

- Manage users
 - Manage vendors
 - Configure system settings
 - Monitor analytics
 - View procurement reports
-

Procurement Officer

Responsibilities:

- Create RFQs
 - Review quotations
 - Compare vendors
 - Initiate procurement requests
 - Monitor deliveries
-

Manager / Approver

Responsibilities:

- Review procurement recommendations
 - Analyze risks
 - Approve or reject procurement requests
 - Monitor spending
-

Vendor

Responsibilities:

- Register on platform
 - Maintain inventory
 - Submit quotations
 - Manage deliveries
 - Generate invoices
-

Vendor Lifecycle

Stage 1: Potential Vendor

Conditions:

- Newly registered
- No order history

Characteristics:

- Identity verified
- No performance data available

Visible Status:

Potential Vendor

Stage 2: Emerging Vendor

Conditions:

- 1–5 successful orders

Characteristics:

- Basic performance metrics available

Visible Status:

Emerging Vendor

Stage 3: Verified Vendor

Conditions:

- 5–20 successful orders

Characteristics:

- Consistent procurement history

Visible Status:

Verified Vendor

Stage 4: Trusted Vendor

Conditions:

- 20+ successful orders

Characteristics:

- High reliability

Visible Status:

Trusted Vendor

Stage 5: Preferred Vendor

Conditions:

- 100+ successful orders

Characteristics:

- Top-performing supplier

Visible Status:

Preferred Vendor

End-to-End Procurement Flow

Step 1: Vendor Registration

Vendor provides:

- Company Name
- GST Number
- PAN
- Contact Details
- Bank Information
- Product Categories

System performs:

- GST Verification
- Email Verification
- Phone Verification

Vendor receives:

Potential Vendor Status

Step 2: Procurement Requirement Creation

Procurement Officer creates RFQ.

Example:

Product: Dell Laptop

Quantity: 20

Budget: ₹10,00,000

Required Delivery: 15 Days

RFQ is published.

Step 3: Vendor Discovery Engine

System automatically identifies:

- Trusted Vendors
- Verified Vendors
- Emerging Vendors
- Potential Vendors

RFQ invitations are distributed fairly.

Example:

3 Established Vendors

2 New Vendors

This ensures vendor growth and marketplace fairness.

Step 4: Vendor Inventory Declaration

Vendor receives RFQ.

Vendor can specify:

Requested Quantity: 20

Available Quantity: 15

Additional Quantity: 5 Available in 7 Days

System supports partial fulfillment.

Step 5: Quotation Submission

Vendor submits:

- Unit Price
- Available Quantity

- Delivery Timeline
- Warranty Details
- Additional Notes

Quotation is stored in the system.

Step 6: Intelligent Quotation Comparison

Traditional ERP:

Price Comparison Only

VendorBridge IQ:

Comparison Based On:

- Price
- Quantity Availability
- Delivery Timeline
- Vendor Maturity
- Previous Performance

Example:

Vendor A: 20 Units 5 Days

Vendor B: 15 Units 4 Days

Vendor C: 20 Units 3 Days

Step 7: Split Procurement Engine

If no single vendor satisfies demand:

Example:

Requirement: 20 Laptops

Vendor A: 15 Units

Vendor B: 5 Units

System recommends:

Split Procurement

Vendor A: 15 Units

Vendor B: 5 Units

This ensures complete order fulfillment.

Step 8: Procurement Risk Analysis

System evaluates:

Vendor Verification

Delivery Reliability

Inventory Availability

Vendor History

Price Abnormalities

Risk Categories:

- Low Risk
- Medium Risk
- High Risk

Manager receives procurement insights before approval.

Step 9: Approval Workflow

Manager reviews:

- Vendor Recommendation
- Procurement Cost
- Risk Analysis
- Delivery Timeline

Actions:

Approve

or

Reject

Step 10: Purchase Order Generation

Approved quotations generate:

Purchase Orders

Examples:

PO-2026-001

or

Split Procurement:

PO-2026-001A

PO-2026-001B

Step 11: Vendor Acceptance

Vendor receives Purchase Order.

Vendor actions:

Accept

Reject

Request Modification

Step 12: Delivery Tracking

Vendor updates order status:

Packed

↓

Shipped

↓

In Transit

↓

Delivered

Buyer can monitor progress in real time.

Step 13: Invoice Generation

Upon delivery:

System generates invoice automatically.

Invoice contains:

- GST
- Tax Calculations
- Purchase Order Reference
- Vendor Details
- Total Amount

Options:

- Download PDF
 - Print
 - Email
-

Step 14: Vendor Performance Evaluation

After order completion:

Buyer rates:

- Product Quality
- Delivery Speed
- Communication
- Service Experience

Ratings contribute to vendor growth.

Step 15: Vendor Reputation Building

System updates:

- Reliability Score
- Delivery Score
- Completion Rate
- Customer Satisfaction

Vendor progresses through maturity levels.

Procurement Intelligence Dashboard

Admin Dashboard Includes:

Procurement Analytics

- Total Procurement Spend
- Monthly Trends
- Approval Statistics

Vendor Analytics

- Top Vendors
- Emerging Vendors
- Vendor Growth

Performance Metrics

- Average Approval Time
 - Delivery Performance
 - Procurement Savings
-

Unique Features

Vendor Growth Lifecycle

Potential Vendor → Emerging Vendor → Verified Vendor → Trusted Vendor → Preferred Vendor

Partial Fulfillment Support

Vendors can fulfill requirements partially rather than being excluded.

Split Procurement

Multiple vendors can collectively satisfy procurement requirements.

Risk Assessment Engine

Managers receive procurement risk analysis before approval.

Vendor Discovery Framework

New vendors receive opportunities despite lacking procurement history.

Procurement Intelligence

Decision support instead of simple ERP transaction processing.

Project Tagline

"VendorBridge IQ – Transforming Procurement from Transaction Management to Intelligent Decision Making."
